

Box contents

- the stroller frame
- the carrier
- 2 front wheels
- 2 rear wheels

1. Unfolding carrier

- Fold the metal frame bars outward and secure them in the plastic clips on the bottom of the carrier.
- Push the velcro under the frame bar and attach the velcro. Repeat on the other side.
- Place the pad in the carrier and make sure the fastening lines are on top of the pad.

2. Wheels

- Attach the front wheels on both sides of the frame.
- To remove the front wheels, press the metal tab and pull the wheel.
- Push the rear wheels onto the frame. Make sure the brakes point backwards and the pins fall into place.
- Push in those pins to remove the wheels from the axle.

3. Unfolding frame

- Undo the clasp on the side.
- Lift the handlebar of the stroller.
- Press the button on the handlebar to extend the last part of the handlebar.

4. Placing carrier

- The bottom of the carrier has guidrails.
- Slide the carrier onto the frame until you hear a click or the latch locks into place.
- To remove the carrier push the latch down while sliding the carrier off the frame.

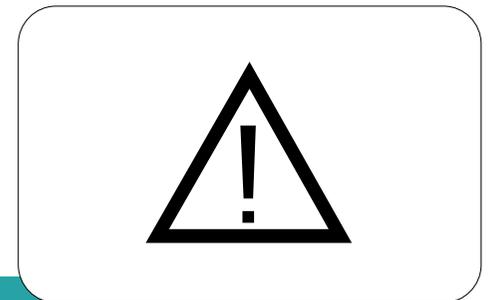

5. Folding frame

- Simply press the button on top of the handlebar and push down.
- The frame will fold and the clasp on the side will lock automatically.

6. Placing in car

- Place the carrier on the car seat with the seat belt latch facing forward.
- Wrap the seat belt around the front of the carrier and lock the seat belt.
- Place the seat belt under the latches and secure them.

Caution

- This carrier is for pets only.
- Max. capacity 12kg.
- Use the fastening lines at all times.
- Do not use when nuts or screws are loosening.
- Clean fabric with mild household soap and water.
- If wheel squeaks or rotates with difficulty, apply grease (like vaseline).
- Read warranty terms on innopet.nl
