

Requirements

- 1 tow bar
- 1 hitch connector
- 15 mm ratchet spanner or open-end spanner
- 1 bicycle

1. Hitch connector

- Start by removing the nut from the rear axle of the bike. the side without the chain is usually the easiest.
- Place the hitch connector on the axle like shown above, place the nut back on the axle and tighten it.

2. Tow bar

- Remove the front wheel of your InnoPet bike trailer.
- Push the tow bar through the U-shaped joints under the stroller.
- Push the safety pin through the hole of the joint and tow bar. Secure by pushing the hook over the pin.

3. Attaching the trailer

- Release the clasp on the side of the stroller.
- Unfold the stroller by pulling the push bar upwards.
- Secure the frame by pressing down on the supports on both sides of the stroller.

Bike kit

With a bike kit, the InnoPet Hercules 2.0, InnoPet Sporty Evolution and InnoPet Sporty Dog Trailer Deluxe can be connected to a bicycle and used as a bike trailer for your dog.

For video instructions how to use the bike kit, scan the QR-code on the front of this manual or visit innopet.nl.

Safety instructions

Take precautions to prevent the bike trailer from tipping over:

- Do not exceed speed limit of 16 km/h (10 mph) on straight roads.
- Do not exceed speed limit of 5 km/h (3.1 mph) when turning corners.
- Do not use on motorised vehicles or e-bikes.
- Keep in mind that the centre of gravity may shift during transit, when the dog moves in the trailer.

InnoPet is not liable for any damage caused by not following this advice.

Caution

- Use the fastening lines at all times.
- Fully unzip the cabin before folding.
- Do not use when nuts or screws are loosening.
- Clean fabric with mild household soap and water.
- If wheel squeaks or rotates with difficulty, apply grease (like vaseline).
- Read warranty terms on innopet.nl
